Subject:- **History**

PROJECT FROM NCERT BOOK FOR ANNUAL EXAMINATION 2018-2019

Subject:- **Economics**

**Case study**

1. Galloping oil prices: Supply-Demand dynamics.
2. Neetu's business school selection: Riding on an indifference curve.
3. A small peak into Big 'B' car collection: Does law of diminishing marginal utility hold good ?

Make projects on any two case studies.

Subject:- **Computer Science**

1. Define a class **Competition** in C++ with the following descriptions:

**Data Members**

Event\_no                      integer  
    i. Description                      char(30)  
    ii. Score                      integer  
b. qualified                      char

**Member functions**

A constructor to assign initial values Event\_No number as 101, Description as "State level" Score is

c. 50 , qualified 'N'.

Input()                      To take the input for event\_no, description and score.

Award(int)                      To award qualified as 'Y', if score is more than the cutoffscore passed as

i. argument to the function else 'N'.

Show()                      To display all the details.

2. Write UDF in C++ which accepts an integer array and its size as arguments/ parameters and assign the elements into a 2 D array of integers in the following format :

if the array is 1,2,3,4,5

The resultant 2D array is given below

1 0 0 0 0

1 2 0 0 0

1 2 3 0 0

1 2 3 4 0

1 2 3 4 5

3. Write UDF in C++ to print the row sum and column sum of a matrix A[2][5].
4. Write UDF in C++ to find a name from a list of names using binary search method.
5. Write UDF in C++ to insert an element in a one-dimensional sorted array in such a way that after insertion the array remains sorted.
6. Write UDF in C++ to sort an array in ascending order using bubble sort
7. Write UDF in C++ to sort an array (storing names) in ascending order using insertion sort.
