

Reach # parents of all the #children going to school

1. Turn off the TV by 8:00 pm. There is nothing more important than your child after eight o'clock on TV.
2. Take 30-45 minutes to view your child's school diary. Make him/her Complete homework.
3. Watch his performance in all subjects daily, take special care of those subjects in which he is not doing well.
4. Their basic education is very important for the future.
5. Make them a habit to sleep till 10:00 in the night and wake up at 6:00 in the morning.
6. If you go to a party / social event and return late with the children, then let the child rest the next day (do not send to school). If you want the child to go to school the next day, then return home till 10.00 PM.
7. Develop the habit of planting plants and taking care of them in your children.
8. * Must tell the stories of the life and struggle of Veer Shivaji, Dr. BR Ambedkar, Savitri Bai Phule Jyotiba Phule to their children at bedtime *
9. Go for a summer vacation (according to your budget) every year. With this they learn to live with different people and in different places.
10. Find out your child's talent and help him / her (he / she may be interested in a topic, music, sports, acting, painting, dance etc.). This will make his life enjoyable.
11. Teach him not to use plastic (at least don't use hot things in plastic).
12. Every Sunday try to make something that they like to eat. Ask them to help you with this (they will love it).
13. Every child is a scientist from birth, he has many questions, we may not be able to answer but due to lack of information, we should not get angry on the question (try to find out the answer and tell them).
14. Tell them about discipline and better ways to live. (Explain about right and wrong)
15. Decide whether a school is the best for admission (based on whether a corporate school or pass percentage is high or acquaintances, neighbors recommended or a government school or a low-budget school). The best school is the one that suits your budget. In future you need to spend more on the education of the child. So you need to save some money today. Apart from this, there are other expenses. Therefore, make a plan thoughtfully.
16. Make a habit of reading and learning in them.
17. They should not be allowed to use mobile phones, if necessary they should be allowed to use mobiles under their care.
18. Ask the child to help in household work. (This includes cooking, cleaning, organizing things.)
19. And most importantly, we should also give good values to our children with education so that they can become successful and right human in life.

We should help our children make their lives beautiful and healthy based on our experience
